

MAG-STRIDE® MAGNETIC MAT

Patented

Effectively capture ferrous metal contamination from foot traffic – collect metal & reduce risk!

Introducing the Mag-Stride® Magnetic Mat — an innovative solution designed to mitigate the introduction of ferrous contaminants into critical processing and workshop zones through foot traffic.

The Mag-Stride® system, which is very easy to maintain, efficiently traps and holds ferrous impurities such as magnetic shavings, metal chips, fine iron particles, rust, magnetic stones, and other magnetic debris. Measuring approximately 770 mm x 970 mm (30.3" x 38.2") and weighing 32 kg (70.5 lbs), it's designed to handle various contaminants effectively.

- ✓ Valued by auditors & QA teams as a valuable addition to continuous improvement programs
- ✓ Designed to work even in dusty & dirty conditions (more effective than sticky mats)
- ✓ Long-term solution, designed to last years

Each Mag-Stride® Magnetic Mat arrives fully assembled for your convenience. Just unpack the unit from its protective wrapping and position it at the exit of workshop or maintenance zones, or at the entrance of sensitive or sanitary areas such as food processing facilities. In addition, it is easy to clean.

MAG-STRIDE® MAGNETIC MAT

PATENTED

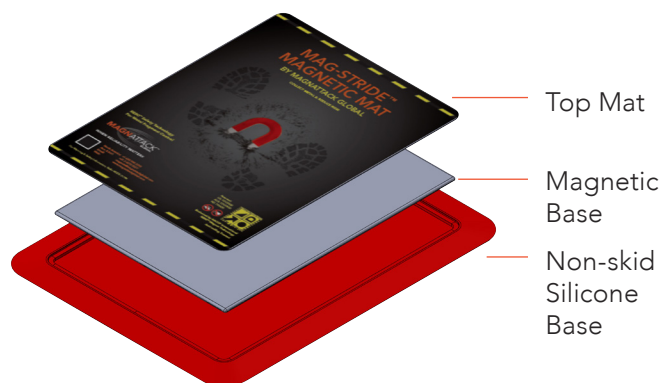

Key Advantages

- Easy to install & clean
- Low maintenance
- Enhanced food safety control
- Increased foreign metal fragment management & mitigation of associated risks
- Sloped silicone surround to reduce trip hazards
- Certified by HACCP International

The Mag-Stride® magnetic base is inserted into the red silicone surround which is specially made with a stepped retainer to hold the magnetic base in place. The top cover mat sits inside a slotted edge, securely holding the mat on the surface of the magnetic base. This makes it significantly easier for customers to install and clean the system.

Inclusions:

- Durable, non-skid red base and ramp
- Powerful magnetic base with over 200 high-strength magnets enclosed
- Fabric top mat – treated with anti-soiling solution to maximize hygiene (cost-effective - we recommend replacement of the top mat only every 4-6 months)
- Optional magnetic cleaning tool for easy collection of metal fragments
