

MIG-MATE MAGNETIC TORCH HOLDER

A SAFE SPOT FOR YOUR TORCH, EVERY TIME.

Dimensions: 5" H; Magnetic Base: 3"

Park it. Protect it. Weld on.

The MSA MIG-Mate gives your MIG torch a secure, magnetic resting point between welds, keeping your workspace organised and your equipment protected. Its heavy-duty, heat-resistant construction and universal cradle design fit most torches, preventing accidental drops and damage while reducing clutter and trip hazards. Quick to mount and easy to maintain, it's a small investment that delivers big returns in safety, efficiency, and equipment life.

FEATURES

- **Heavy-duty, heat-resistant** construction built for demanding welding environments
- **Universal magnetic cradle** securely holds most MIG torches, preventing drops and damage. Extra rare earth magnet to hold your wire cutters
- **Reduces clutter and trip hazards** by keeping the torch off surfaces between welds
- **Compact and easy to mount. Only weighs 2 lbs!**

BENEFITS OF THE MIG-MATE TORCH HOLDER

- **Improved safety** - keeps the torch off the floor and work surfaces, reducing trip hazards and burns
- **Extended equipment life** - prevents accidental drops that damage the torch
- **Increased efficiency** - quick, reliable access to the torch speeds up workflow between welds
- **Reduced downtime** - less time spent searching for or repairing a dropped torch
- **Cleaner, more organised workspace** - cuts down on clutter around the welding station
- **Low-cost investment, high return** - an inexpensive add-on that protects a much more valuable tool
