

MEERKAT™ Front Mount Magnetic Sweeper for Skid Steers

The MSA Meerkat™ is a powerful, front-mounted magnetic sweeper engineered specifically for skid steers and track loaders. Designed to tackle tough, dirty commercial and industrial jobsites, the Meerkat™ eliminates hazards by picking up and removing various debris types—including screws, wire, bolts, nuts, rebar, railway spikes, wrenches, and discarded construction or demolition material.

Massive Clearance

- Equipped with an ultra-powerful magnet capable of grabbing a 2.5" nail from a full 10" height
- Utilizing C8 magnets, the magnetic field strength will never decrease over years of use.

Rest-and-Ride Zone:

- Lift arms can simply be set on the lower stops to automatically position the magnet in the ideal 3" to 4" operating zone
- In the event of a ground strike, debris is wiped to the back of the magnet rather than released
- Heavy steel ribs between magnet assemblies prevent structural damage during large impacts

Universal Fit

- Easily mounts via a universal adapter plate with a 0-degree lead angle for perfect positioning
- Couples just like a standard bucket; latch into the adapter plate, engage safeties, and start sweeping
- Features a gravity-powered, Swing-Out Clean-Off pivoting system that dumps directly into 5- to 8-foot dumpsters.

14250 Judicial Road, Burnsville, MN 55306

Optional Debris Digging Rakes

- Simultaneously grooms and re-surfaces job sites while digging up and collecting buried metal
- The rake provides a clear visual track showing exactly which areas have been swept.

Meerkat Technical Specifications:

Product Name	Meerkat - Skid Steer Magnetic Sweeper
Sweeper Width	Meerkat 67 - 67"
Magnet Housing Dimensions	3 housings each: 6.8"W x 5.25"H x 20.75"L
Magnet Dimensions Inside Housing	6"W x 5"H x 20"L
Total Product Weight	Meerkat 67 - 737 LBS
Total Shipping Weight	Meerkat 67 - 821 LBS
Cleaning Method	Swing-out, clean-off, pivoting magnet system, gravity powered
Sweeping Height Adjustability	Continuous, using lift arms of the skid steer
Mounting Point	Universal skid steer adaptor plate
Magnet Type	Permanently charged C8 magnets
Fit	Designed to fit most skid steers, track loaders
Maximum Lifting Height	10" (measures in 2 1/2" 8 penny nails)
Construction	Steel, stainless steel
