

MAGNATTACK®
WHEN RELIABILITY MATTERS

INDUSTRIAL RETENTION MAT

Patented

**Minimise the risk of ferrous contamination
in assembly and workshop areas!**

The patented Industrial Retention Mat is engineered to mitigate the introduction of ferrous contaminants into non-food industrial environments, including automotive manufacturing plants, metal fabrication shops, warehouses, and heavy equipment facilities, via foot traffic.

The Industrial Retention Mat provides a reliable first line of defence against tracked-in metal debris, including metal shavings, wear iron, swarf and rust, before they reach sensitive equipment, production areas, or clean zones.

- ✓ Supports WHS/OSHA compliance requirements and satisfies safety auditors, plant managers, quality assurance personnel, and customers alike
- ✓ Designed to work even in dusty & dirty conditions (more effective than sticky mats)
- ✓ Long-term solution, designed to last years

Measuring approximately 770 mm x 970 mm (30.3" x 38.2") and weighing 32 kg (70.5 lbs), it's designed to handle various contaminants effectively.

Each Magnetic Mat arrives fully assembled for your convenience. Just unpack the unit from its protective wrapping and position it at the entry and exit points of factories, workshops, maintenance departments, and high-traffic work areas.

In addition, it is easy to clean.

INDUSTRIAL RETENTION MAT

PATENTED

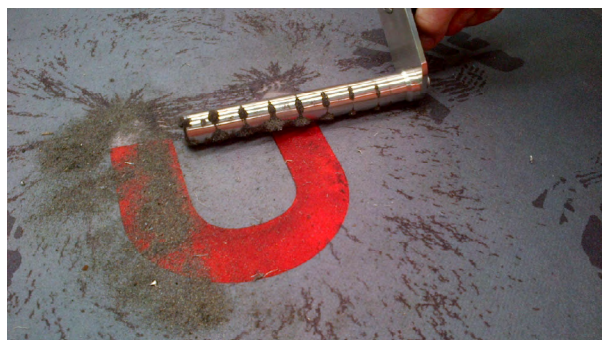

Key Advantages

- Easy to install & clean
- Low maintenance
- Effectively captures and retains ferrous contamination
- Increased foreign metal fragment management & mitigation of associated risks
- Sloped silicone surround to reduce trip hazards

The magnetic base is inserted into the red silicone surround which is specially made with a stepped retainer to hold the magnetic base in place. The top cover mat sits inside a slotted edge, securely holding the mat on the surface of the magnetic base. This makes it significantly easier for customers to install and clean the system.

Inclusions:

- Durable, non-skid red base and ramp
- Powerful magnetic base with over 200 high-strength magnets enclosed
- Fabric top mat – treated with anti-soiling solution to maximise hygiene (cost-effective - we recommend replacement of the top mat only every 4-6 months)
- Optional magnetic cleaning tool for easy collection of metal fragments
